**Judges Comments:** This book trailer is a very clever piece of digital media. It takes the viewer on a journey, where they feel like they are actually in the computer game itself. We become the book character as it were. This is a collation of well thought-out still images, screenshots, animation combined with compelling gaming-type music resulting in a dramatic trailer. I haven't seen anything quite like this before and it made me want to read more... Excellent!

The music supported the narrator's voice beautifully and the choice of graphics, were well thought-out throughout the story, which left me with shivers at the end. Well done, a great use of software to re-tell a story!

#### Judges Comments:

This documentary wins the perfect score. It has been well narrated and filmed to a high standard using industry-standardised shots, such as 'over the shoulder filming techniques during interviews. It follows the look and feel of a documentary as it moves between interviews and gathered footage with voice-overs. The message is very informative and shows the producers 'know their science'. I learned a lot in a short amount of time, when I watched this piece. Very professional!
